

IDERI note 2.0 - 3.2 Change Log

Builds 278-1120

| | |
|-------------------------------|--|
| Build 278 (01/30/2008) | Initial build for IDERI note administrator, IDERI note server, IDERI note client components |
| Build 279 (02/17/2008) | <p>Fixes for IDERI note administrator:</p> <ul style="list-style-type: none">• Several places where impersonation was nested have been resolved. This bug could result in accessing IDERI note server resources as the interactively logged in user instead of the user whose credentials were passed in the IDERI note administrator logging dialog <p>Build 279 of IDERI note administrator contains intadmin.exe as version 2.0.279.0, all other binaries as 2.0.278.0</p> <p>Fixes for IDERI note client components:</p> <ul style="list-style-type: none">• SERVERNAME is now a MSI property exposed to transforms, so a server name can be specified for the client components• inotecln.exe deals with server name set to "???", which is the default value if no SERVERNAME property has been specified• intclnt.msi now rejects polling intervals of 0 during UI sequence <p>Build 279 of IDERI note client components contains inotecln.exe as version 2.0.279.0, all other binaries as 2.0.278.0</p> <p>For both intadmin.msi and intclnt.msi of build 279, new full setups were made as major updates. A major update automatically uninstalls a previous version during installation.</p> |

Build 280 (02/24/2008)**Fixes for IDERI note service and IDERI note client components:**

- Changes in both the server and the client so multiple client instances running on a user's desktop can receive "push" notifications independently from each other

Build 280 of IDERI note client components contains inotecln.exe and inotecln.dll as version 2.0.280.0, all other binaries as 2.0.278.0

Build 280 of IDERI note server contains inotesvc.exe as version 2.0.280.0, all other binaries as 2.0.278.0

For both inotesvc.msi and intclnt.msi of build 280, new full setups were made as major updates. A major update automatically uninstalls a previous version during installation.

Build 281 (03/24/2008)**Fixes for IDERI note server:**

- Fixed the evaluation license misuse detection code bug
- Control panel applet now shows the version number in its caption

Build 281 of IDERI note server contains inotesvc.exe and inotesvc.cpl as version 2.0.281.0, all other binaries as 2.0.278.0

Fixes for IDERI note administrator:

- Name of the connected server is shown now in the caption
- Client version number is shown in the active client connections dialog

Build 281 of IDERI note administrator contains intadmin.exe and intadmin.dll as version 2.0.281.0, all other binaries as 2.0.278.0

For both inotesvc.msi and intadmin.msi of build 281, new full setups were made as major updates. A major update automatically uninstalls a previous version during installation.

Build 282 (04/26/2008)

Fixes for IDERI note client components:

- Messages are now always displayed with automatic line breaks enabled

Build 282 of IDERI note client components contains inotemsg.exe, intmsgsr.deu, intmsgsr.fra, intmsgsr.esp, intmsgsr.slv, intmsgsr.plk, intmsgsr.rus, intmsgsr.hrv und intmsgsr.ptg as version 2.0.282.0, inotecln.exe and inotecln.dll as version 2.0.280.0, all other binaries as 2.0.278.0

For intclnt.msi of build 282, a new full setup has been made as a major update. A major update automatically uninstalls a previous version during installation.

Build 283 (10/12/2008)

Internal Release

Build 284 (10/26/2008)

Fixes for IDERI note client components:

- Client now preferably connects to a Service Connection Point in its AD site
- Added slovenian resource DLL

Build 284 of IDERI note client components contains inotecln.exe and intmsgsr.slv as version 2.0.284.0, inotemsg.exe, intmsgsr.deu, intmsgsr.fra, intmsgsr.esp, intmsgsr.plk, intmsgsr.rus, intmsgsr.hrv und intmsgsr.ptg as version 2.0.282.0, inotecln.dll as version 2.0.280.0, all other binaries as 2.0.278.0

Fixes for IDERI note server:

- Setup: The test for an existing Service Connection Point is now limited to the current AD site
- On Vista and Server 2008 an AccessCheck is now repeated with the linked token, if necessary

Build 284 of IDERI note server contains inotesvc.exe as version 2.0.284.0, inotesvc.cpl as version 2.0.281.0, all other binaries as 2.0.278.0

For both intclnt.msi and innotesvc.msi of build 284, a new full setup has been made as a major update. A major update automatically uninstalls a previous version during installation.

Build 285 (01/10/2009)**Fixes for IDERI note client components:**

- Fixed bug where client would deadlock under very rare conditions

Build 285 of IDERI note client components contains inotemsg.exe as 2.0.285.0, inotecln.exe and intmsgsr.slv as version 2.0.284.0, intmsgsr.deu, intmsgsr.fra, intmsgsr.esp, intmsgsr.plk, intmsgsr.rus, intmsgsr.hrv und intmsgsr.ptg as version 2.0.282.0, inotecln.dll as version 2.0.280.0, all other binaries as 2.0.278.0

Fixes for IDERI note server:

- Added a fix for the linked token check on Vista and Server 2008 introduced with version 2.0.284.0, that lead to a misleading error message (“A specified logon session does not exist. It may already have been terminated.”) if access was denied.

Build 285 of IDERI note server contains inotesvc.exe as version 2.0.285.0, inotesvc.cpl as version 2.0.281.0, all other binaries as 2.0.278.0

For both intclnt.msi and innotesvc.msi of build 285, a new full setup has been made as a major update. A major update automatically uninstalls a previous version during installation.

Build 416 (10/12/2008)**Initial release of IDERI note Administrator and IDERI note Command Line Tools as version 2.1**

Build 416 of IDERI note Administrator and IDERI note Command Line Tools contains all files as version 2.1.416

For both inotecmd.msi and intadmin.msi of build 416, new full setups were made as major updates. A major update automatically uninstalls a previous version during installation.

Build 417 (12/03/2008)**Fixes for IDERI note administrator:**

- Bugfix: If a computer name has been supplied in the service notification wizard, but during the course of the wizard, a service on the local computer has specified, the previously supplied computer would still be accessed. This way, it was possible to inadvertently install a service notification on a remote computer although an installation on the local computer was intended.
- Fixed two typos in the user interface
- Added inotedel.exe to the command line tools that ship with intadmin.msi

Build 417 of IDERI note administrator contains intadmin.exe and intadmrs.deu as version 2.1.417.0, all other binaries as 2.1.416.0

For intadmin.msi of build 417 a new full setup was made as a major update. A major update automatically uninstalls a previous version during installation.

Build 509 (07/20/2009)**Initial Release of IDERI note client, ticker, sidebar gadget und administration tools as version 2.2**

Build 509 of IDERI note client, ticker, sidebar gadget und administration tools contain all files as version 2.2.509.0

For intclnt.msi of build 509 a new full setup was made as a major update. A major update automatically uninstalls a previous version during installation.

Build 286 (09/22/2009)**Fixes for IDERI note server:**

- New binary intpshlp.exe (issue 0000004).
- Push notification has been parallelized into up to 64 simultaneous intpshlp.exe processes (issue 0000004).

Build 286 of IDERI note server contains inotesvc.exe and intpshlp.exe as version 2.0.286.0, inotesvc.cpl as version 2.0.281.0, all other binaries as version 2.0.278.0

For inotesvc.msi of build 286 a new full setup was made as a major update. A major update automatically uninstalls a previous version during installation.

Build 418 (09/22/2009)**Fixes for IDERI note administrator:**

- An wait cursor is shown while the dialog for push notifications is shown (issue 0000011).
- A bug was fixed that prevented local service failure notifications from being created (issue 0000005).
- The specified duration for service failure notifications is no longer being ignored (issue 0000002).
- In standard configuration, deleted messages are no longer displayed (issue 0000003).

Build 418 of IDERI note administrator contains intadmin.exe, intadmin.dll, inotecmd.exe, inotedel.exe, intadmrs.deu and inotecmd.msi as version 2.1.418.0, all other binaries as version 2.1.416.0

Fixes for IDERI note command line tools:

- Command line tools have been adapted for experimental Wine support (issue 0000006).
- New tool namerslv.exe for resolving principal names into SIDs for operation under Wine (issue 0000006).

Build 418 of IDERI note command line tools contains inotedel.exe, namerslv.exe, inotecmd.exe and intadmin.dll as version 2.1.418.0, all other binaries as version 2.1.416.0

For intadmin.msi and inotecmd.msi of Build 418, new full setups were made as a major update. A major update automatically uninstalls a previous version during installation.

Build 510 (09/26/2009)**Fixes for IDERI note Client:**

- Better experimental support for operation under Wine (issue 0000007).
- Client binaries now have 2.2 as their product version (issue 0000008).

Build 510 of IDERI note client contains inotecln.exe and inotecln.dll as Version 2.2.510.0, all other binaries as version 2.1.509.0

Fixes for IDERI note administration tools:

- Typos and bad table formatting in the English product documentation has been fixed (issue 0000013 and 0000014).

Build 510 of IDERI note administration tools contains inoteenu.pdf as version 2.2.510.0, all other binaries as version 2.2.509.0

For intclnt.msi and admtools.msi of build 510, new full setups were made as a major update. A major update automatically uninstalls a previous version during installation.

Build 419 (09/22/2009)

Fixes for IDERI note administrator:

- Creation of service failure notifications ignored the specification of server determination via AD query (issue 0000016)
- Creation of a service failure notification with a recovery option set to restart the service failed with an access denied error (issue 0000018)

Build 419 of IDERI note administrator contains intadmin.exe as version 2.1.419.0, intadmin.dll, inotecmd.exe, inotedel.exe, intadmrs.deu and inotecmd.msi as version 2.1.418.0, all other binaries as version 2.1.416.0

For intadmin.msi of Build 419, new full setup was made as a major update. A major update automatically uninstalls a previous version during installation.

Build 287 (10/06/2009)

Fixes for IDERI note server:

- When started as an unelevated user, the setup MSI package would not correctly determine domain administrators' group membership (issue 0000019).

Build 287 of IDERI note server contains inotesvc.exe and intpshlp.exe as version 2.0.286.0, inotesvc.cpl as version 2.0.281.0, all other binaries as version 2.0.278.0. Build 287 is identical to build 286 and only has a bug fixed in a custom action used during setup.

For inotesvc.msi of build 287 a new full setup was made as a major update. A major update automatically uninstalls a previous version during installation.

Build 511 (11/15/2009)

Fixes for IDERI note Client:

- Changes for better Windows Logo compliance (issue 0000025).
- LaunchCondition in MSI file for administrators group membership now only appears for full UI or reduced UI (issue 0000033).

Build 511 of IDERI note client contains inotecln.exe as Version 2.2.511.0, inotecln.dll as Version 2.2.510.0, all other binaries as version 2.1.509.0

Fixes for IDERI note Ticker:

- Changes for better Windows Logo compliance (issue 0000031).
- LaunchCondition in MSI file for administrators group membership now only appears for full UI or reduced UI (issue 0000032).

Build 511 of IDERI note Ticker has only changes in the MSI setup file, all binaries installed by this version have version 2.2.509.0

Fixes for IDERI note administration tools:

- Changes for better Windows Logo compliance (issue 0000026).
- Typos in the German product documentation have been fixed (issue 0000024).

Build 511 of IDERI note administration tools contains inoteedu.pdf as 2.2.511.0, inoteenu.pdf as version 2.2.510.0, all other binaries as version 2.2.509.0

For intclnt.msi, admtools.msi and inotickr.msi of build 511, new full setups were made as a major update. A major update automatically uninstalls a previous version during installation.

Build 420 (12/28/2009)**Fixes for IDERI note administrator:**

- Changes for better Windows Logo compliance (issue 0000027).
- LaunchCondition in MSI file for administrators group membership now only appears for full UI or reduced UI (issue 0000049).

Build 420 of IDERI note administrator contains inotecmd.msi as version 2.1.420.0, intadmin.exe as version 2.1.419.0, intadmin.dll, inotecmd.exe, inotedel.exe, intadmrs.deu and inotecmd.msi as version 2.1.418.0, all other binaries as version 2.1.416.0

Fixes for IDERI note command line tools:

- Changes for better Windows Logo compliance (issue 0000028).
- LaunchCondition in MSI file for administrators group membership now only appears for full UI or reduced UI (issue 0000050)

For build 420 of IDERI note command line tools, only changes to the MSI setup file have been made. It contains inotedel.exe, namerslv.exe, inotecmd.exe and intadmin.dll as version 2.1.418.0, all other binaries as version 2.1.416.0

For intadmin.msi and inotecmd.msi of Build 420, new full setups were made as a major update. A major update automatically uninstalls a previous version during installation.

Build 288 (05/15/2010)**Fixes for IDERI note server:**

- Memory leak in the server when clients request messages that have already been acknowledged and should therefore not be delivered anymore to the client (issue 0000076).

Build 288 of IDERI note server contains inotesvc.exe as version 2.0.288.0, intpshlp.exe as version 2.0.286.0, inotesvc.cpl as version 2.0.281.0, all other binaries as version 2.0.278.0.

For inotesvc.msi of build 288 a new full setup was made as a major update. A major update automatically uninstalls a previous version during installation.

Build 512 (05/15/2010)

Fixes for IDERI note Client:

- If the server is restarted with its database files deleted beforehand, the client erroneously shows old messages (issue 0000047).
- Under Wine, the client fails to reconnect to the server if the connection to the server is interrupted temporarily (issue 0000075).

Build 512 of IDERI note client contains inotecln.exe, inotecln.dll and inotemsg.dll as Version 2.2.512.0, all other binaries as version 2.1.509.0

For intclnt.msi of build 512 a new full setup was made as a major update. A major update automatically uninstalls a previous version during installation.

Build 637 (08/07/2010)

Initial release of IDERI note Client, IDERI note Service, IDERI note Administrator, IDERI note Administration Tools and IDERI note Command Line Tools as version 2.3

Build 637 of IDERI note Client, IDERI note Service, IDERI note Administrator, IDERI note Administration Tools and IDERI note Command Line Tools contain all files as version 2.3.637

For intclnt.msi, inotesvc.msi, intadmin.msi, admtools.msi and inotecmd.msi of build 637, new full setups were made as major updates. A major update automatically uninstalls a previous version during installation.

Build 638 (12/05/2010)**Fixes for IDERI note administrator:**

- The initial release of IDERI note Administrator version 2.3.637 contained an inotecmd.msi file that was not digitally signed. Build 638 now contains a digitally signed version of inotecmd.msi version 2.3.637.

Build 638 of IDERI note administrator contains the same files as in version 2.3.637. However, the MSI file for the command line tools is a digitally signed file in this version.

For intadmin.msi of build 638 a new full setup was made as a major update. A major update automatically uninstalls a previous version during installation.

Fixes for IDERI note administration tools:

- This build contains the updated documentation for IDERI note version 2.3 as pdf files.

Build 638 of IDERI note administration tools contains the same files as in version 2.3.637, except for the product documentation files which have been updated for IDERI note version 2.3.

For admtools.msi of build 638 a new full setup was made as a major update. A major update automatically uninstalls a previous version during installation.

Build 639 (12/20/2010)**Fixes for IDERI note administrator:**

- Minor errors fixed in the user interface (issues 116, 117, 119).

Build 639 of IDERI note administrator contains intadm.exe and intadmrs.deu as version 2.3.639, all other files as version 2.3.637.

For intadmin.msi of build 639 a new full setup was made as a major update. A major update automatically uninstalls a previous version during installation.

Fixes for IDERI note administration tools:

- This build contains the updated documentation for IDERI note version 2.3.639.0 as pdf files.

Build 639 of IDERI note administration tools contains the product documentation pdf files as version 2.3.639.0, all other files as version 2.3.637.

For admtools.msi of build 639 a new full setup was made as a major update. A major update automatically uninstalls a previous version during installation.

Build 640 (05/23/2011)**Fixes for IDERI note administrator:**

- Mitigation fix against a possible binary planting attack (issue 131).

Build 640 of IDERI note administrator contains dwmapi.dll as version 2.3.640, intadm.exe and intadmrs.deu as version 2.3.639, all other files as version 2.3.637.

For intadmin.msi of build 640 a new full setup was made as a major update. A major update automatically uninstalls a previous version during installation.

Fixes for IDERI note client components:

- Fix: Typo on the "Client Start Options" page of the MSI installer (issue 100).
- Fix: If the mouse cursor rests on a message popup window, the popup window cannot be removed (issue 121).
- Mitigation fix against a possible binary planting attack (issue 131).

Build 640 of the IDERI note client components contains intmsgng.exe and dwmapi.dll as version 2.3.640.0, and all other files as version 2.3.637.

For intclnt.msi of build 640 a new full setup was made as a major update. A major update automatically uninstalls a previous version during installation.

Build 641 (09/25/2011)**Fixes for IDERI note administration tools:**

- This build contains the updated documentation for IDERI note version 2.4.653.0 as pdf files.

Build 641 of IDERI note administration tools contains the product documentation pdf files as version 2.4.653.0, all other files as version 2.3.637.

For admtools.msi of build 641 a new full setup was made as a major update. A major update automatically uninstalls a previous version during installation.

Build 642 (11/04/2011)**Fixes for IDERI note administration tools:**

- Client customization wizard updated for new polling interval settings (issue 136)
- Product documentation added as version 2.4.654 (issue 136)

Build 642 of IDERI note administration tools contains inclwiz.exe and inclwrs.deu as version 2.3.642, the product documentation pdf files as version 2.4.654.0, all other files as version 2.3.637.

For admtools.msi of build 642 a new full setup was made as a major update. A major update automatically uninstalls a previous version during installation.

Fixes for IDERI note client components:

- Setup: New polling interval settings added (issue 136).

Build 642 of the IDERI note client components contains intmsgng.exe and dwmapi.dll as version 2.3.640.0 and all other files as version 2.3.637. If the client components in version 2.3.640 are installed on a computer, there is no need to update to version 2.3.642.

For intclnt.msi of build 642 a new full setup was made as a major update. A major update automatically uninstalls a previous version during installation.

Build 643 (01/04/2012)**Fixes for IDERI note administration tools:**

- Product documentation updated to version 2.4.655 (issue 138)
- Administrative templates for group policy settings updated to version 2.3.643 (issue 138)

Build 643 of IDERI note administration tools contains the administrative templates for group policy settings as version 2.3.643, inclwiz.exe and inclwrs.deu as version 2.3.642, the product documentation pdf files as version 2.4.655.0, all other files as version 2.3.637.

For admtools.msi of build 643 a new full setup was made as a major update. A major update automatically uninstalls a previous version during installation.

Fixes for IDERI note client components:

- The timeouts for information and warning messages are infinite now by default for messaging-style notification windows (issue 138).
- If the escape or return key was pressed while a messaging style notification window had the keyboard focus, it was impossible to dismiss or acknowledge a message (issue 139).

Build 643 of the IDERI note client components contains intmsgng.exe as version 2.3.643.0, dwmapi.dll as version 2.3.640.0 and all other files as version 2.3.637.

For intclnt.msi of build 643 a new full setup was made as a major update. A major update automatically uninstalls a previous version during installation.

Build 653 (09/25/2011)**Initial release of IDERI note Administrator and IDERI note Service as version 2.4**

Build 653 of IDERI note Administrator and IDERI note Service contains all files as version 2.4.653

For both intadmin.msi and inotesvc.msi of build 653, new full setups were made as major updates. A major update automatically uninstalls a previous version during installation.

Build 654 (11/04/2011)**Fixes for IDERI note server:**

- Setup: A warning page was added that appears if the IDERI note server is installed on a workstation/client computer (issue 137)

Build 654 of IDERI note Service contains all files as version 2.4.653. If version 2.4.653 of IDERI note Service is already installed on a computer, there is no need to install version 2.4.654. For inotesvc.msi of build 654, a new full setup was made as a major update. A major update automatically uninstalls a previous version during installation.

Build 656 (06/05/2012)**Fixes for IDERI note server:**

- A user without the right to create a message was able to create new messages with an empty list of recipients (issue 145)

Build 656 of IDERI note Service contains inotesvc.exe as version 2.4.656 and all other files as version 2.4.653. For inotesvc.msi of build 656, a new full setup was made as a major update. A major update automatically uninstalls a previous version during installation.

Build 675 (06/29/2012)**Initial release of IDERI note Client and IDERI note Administration Tools as version 2.5**

Build 675 of IDERI note Client and IDERI note Administration Tools contain all files as version 2.5.675. For intclnt.msi and admtools.msi of build 675, new full setups were made as major updates. A major update automatically uninstalls a previous version during installation.

Build 713/715 (12/06/2013)

Initial Release of IDERI note Command Line Tools, IDERI note Administrator, IDERI note Service, IDERI note Administration Tools, IDERI note Client Components in Version 2.6

Fixes and Features:

- Turn on sound when for alarm messages if sound is currently muted (Issue 157).
 - Information when mouse is hovered over the tray icon (Issue 158).
 - Multiple tray icons for multiple servers (Issue 159).
 - No envelope shown when message is already being shown (Issue 161).
 - Do not show stock IDERI Client Logos with transparency (Issue 162).
 - Fetch history from server (Issue 163).
 - Changing AnimationType and AnimationSpeed yield no noticeable differences (Issue 165).
 - Group policy for window stile doesn't work (Issue 166).
 - Russian localization of history UI is incomplete (Issue 171).
 - Client adaptations for Windows 8 (Issue 174).
 - Ticker vanishes when task bar is hidden (Issue 175).
 - Cannot swipe in charms menu when Ticker is docked (Issue 176).
 - Direction of ticker font changes depending on docking edge. (Issue 177).
 - When ticker starts without being docked, minimize and close system buttons have wrong size (Issue 179).
-

-
- When ticker runs without being docked, changing the font doesn't change window dimensions accordingly. (Issue 180).
 - Balloon tool tips do not work properly anymore (Issue 183).
 - If a custom polling interval is specified, that is not exactly 5 minutes, no radio control is selected (Issue 184).
 - Wine 1.6 compatibility changes (Issue 194).
 - History title can be changed using a double-click on the outlook bar caption (Issue 195).
 - Group policy settings for sounds do not work (Issue 196).
 - Font scaling for messenger style notifications (Issue 197).
 - Control Panel Applet still has version 2.4 (Issue 198).
 - Menu Bar in history application can be dragged off the application window (Issue 200).

Build 713 (IDERI note Command Line Tools, IDERI note Administrator, IDERI note Service, IDERI note Administration Tools) contains all files as version 2.6.713, Build 715 (IDERI note Client Components) contains all files as version 2.6.715.

For inotesvc.msi, intadmin.msi, inotecmd.msi and admtools.msi in Build 713, new full setups were made as major updates. For intclnt.msi in Build 715, a new full setup was made as a major update. A major update automatically uninstalls a previous version during installation.

Build 716 (01/27/2014)**Fixes for IDERI note administration tools:**

- Documentation updated for IDERI note 2.6

Build 716 contains the product documentation (pdf files) as Version 2.6.716.0 and all other binary files as version 2.6.713.0

For admtools.msi in Build 716, a new full setup has been made as a major update. A major update automatically uninstalls a previous version during installation.

Build 718 (03/09/2014)**Fixes for IDERI note administrator:**

- Garbage is shown for the message statistics of a message with reception notifications but without acknowledgement notifications (Issue 211)
- IDERI note Administrator won't start on server core SKUs of Windows because oledlg.dll cannot be loaded (Issue 213)

Fixes for IDERI note Service:

- If a message is deleted, clients cannot retrieve history information for newer messages (Issue 209)

Fixes for IDERI note Client Components:

- Ticker won't start on server core SKUs of Windows because oledlg.dll cannot be loaded (Issue 214)

Build 718 contains all files as Version 2.6.718.0

For intadmin.msi, inotesvc.msi and intclnt.msi in Build 718, a new full setup has been made as a major update. A major update automatically uninstalls a previous version during installation.

Build 745 (07/31/2014)

Initial Release of IDERI note Command Line Tools, IDERI note Administrator, IDERI note Service, IDERI note Administration Tools, IDERI note Client Components in Version 2.7

Fixes and Features:

- Garbage display of message statistics if a message has only acknowledgement notifications (Issue 211).
- Ticker does not run on server core (Issue 214).
- UI naming inconsistencies (Issue 227).
- "Do-not-disturb" mode (Issue 160, 168, 231, 232, 236, 242).
- Search feature in acknowledgements window (Issue 187).
- Make active connections window resizable (Issue 111, 233).

- Live display of connected clients' group memberships for easier analysis of multi-domain environments (Issue 307).
- UI Fixes in updater application (Issues 286, 288).
- Message flags get lost when copying a message in intadmin.exe (Issue 293).
- Lite version ommand line tool help text corrected (Issue 312).
- Excel export directory is now user's documents directory by default (Issue 316).

Build 800 (IDERI note Client Components, IDERI note Command Line Tools, IDERI note Administrator, IDERI note Service, IDERI note Administration Tools, IDERI note Lite Messaging) contains all files as version 2.8.800.

For intclnt.msi, litetools.msi, inotesvc.msi, intadmin.msi, inotecmd.msi and admtools.msi in Build 800, new full setups were made as major updates. A major update automatically uninstalls a previous version during installation.

Build 804 (07/04/2015)

Fixes for IDERI note Service:

- Server can now be configured to refuse the acceptance of new messages with reception or acknowledgement notifications (Issue 337).
- Server does not anymore limit legitimate recipients of lite mode messages to "Authenticated Users" (Issue 338).

Fixes for IDERI note Administrator, IDERI note Command Line Tools, IDERI note Lite Messaging

- Updated error message support for Issue 337 (Issue 337)

Build 804 (IDERI note Command Line Tools, IDERI note Administrator, IDERI note Service, IDERI note Lite Messaging) contains all files as version 2.8.804.

For litetools.msi, inotesvc.msi, intadmin.msi, and inotecmd.msi in Build 804, new full setups were made as major updates. A major update automatically uninstalls a previous version during installation.

Build 805 (08/18/2015)

Fixes for IDERI note Service and IDERI note Command Line Tools:

- Updating messages via command line tool works unreliable (Issue 340).

Fixes for IDERI note Administrator

- Unreliable selection of previous message after refresh in filtered and unsorted message view (Issue 341)

Build 805 (IDERI note Command Line Tools, IDERI note Administrator, IDERI note Service) contains all files as version 2.8.805.

For inotesvc.msi, intadmin.msi, and inotecmd.msi in Build 805, new full setups were made as major updates. A major update automatically uninstalls a previous version during installation.

Build 809 (10/24/2015)

Fixes for IDERI note Administrator:

- Child domains are not shown in AD object picker dialog (Issue 347).

Build 809 (IDERI note Administrator) contains all files as version 2.8.809.

For intadmin.msi in Build 809 a new full setup has been made as a major update. A major update automatically uninstalls a previous version during installation.

Build 824 (12/22/2015)

Initial Release of IDERI note Administrator, IDERI note Lite Messaging Tools, IDERI note Command Line Tools, IDERI note Client Components, IDERI note Administration Tools and IDERI note SDK in Version 2.9

Fixes and Features:

- Introduction of the IDERI note SDK (Issue 108).
- Logotest for Windows 10.
- Various user interface enhancements.

Build 824 (IDERI note Administrator, IDERI note Lite Messaging Tools, IDERI note Command Line Tools, IDERI note Client Components, IDERI note Administration Tools and IDERI note Command Line SDK) contains all files as version 2.9.824.0.

For intadmin.msi, litetools.msi, inotecmd.msi, intclnt.msi, admtools.msi and sdk.msi in Build 824, new full setups were made as major updates. A major update automatically uninstalls a previous version during installation.

Build 879 (11/03/2016)

Initial Release of IDERI note Administrator, IDERI note Lite Messaging Tools, IDERI note Command Line Tools, IDERI note Client Components and IDERI note Administration Tools in Version 2.10

Fixes and Features:

- Improved customizability of the IDERI note Client.
- Improved behaviour with Active Directory account lockout policies.
- IDERI note client ticker: various improvements and bug fixes.
- IDERI note command line tools: various improvements and bug fixes.

Build 879 (IDERI note Administrator, IDERI note Lite Messaging Tools, IDERI note Command Line Tools, IDERI note Client Components and IDERI note Administration Tools) contains all files as version 2.10.879.0.

For intadmin.msi, litetools.msi, inotecmd.msi, intclnt.msi and admtools.msi in Build 879, new full setups were made as major updates. A major update automatically uninstalls a previous version during installation.

Build 943 (07/04/2017)

Initial Release of IDERI note Administrator, IDERI note Lite Messaging Tools, IDERI note Command Line Tools, IDERI note Client Components and IDERI note Administration Tools in Version 2.11

Fixes and Features:

- Strongly improved client localizations, introduction of Italian as a new client user interface language.
- Various improvements of the ticker show and hide behaviour.
- Uniform start interface for multiple client instances to multiple servers.
- Improved behaviour of the client and its ticker instance with respect to keyboard focus.
- Improved sorting behaviour in IDERI note administrator list controls.
- Support for remote logon to IDERI note servers with IDERI note administrator and lite messaging tools across non-trusted domain boundaries (including workgroup computers).

Build 943 (IDERI note Administrator, IDERI note Lite Messaging Tools, IDERI note Command Line Tools, IDERI note Client Components and IDERI note Administration Tools) contains all files as version 2.11.943.0.

For intadmin.msi, litetools.msi, inotecmd.msi, intclnt.msi and admtools.msi in Build 943, new full setups were made as major updates. A major update automatically uninstalls a previous version during installation.

Build 944 (02/28/2018)**Fixes for IDERI note Administrator, IDERI note Command Line Tools, IDERI note SDK and IDERI note Client Components for Version 2.11****Fixes and Features:**

- Under heavy server load, clients would not always clean up their server connection.

Build 944 (IDERI note Administrator, IDERI note SDK, IDERI note Command Line Tools and IDERI note Client Components) contains all files as version 2.11.944.0.

For intadmin.msi, sdk.msi, inotecmd.msi and intclnt.msi in Build 944, new full setups were made as major updates. A major update automatically uninstalls a previous version during installation.

Build 2.8.811 (03/18/2018)**Fix for IDERI note Service:**

- Improved detection of duplicate connections.

Build 811 (IDERI note Service) contains all files as version 2.8.811.

For inotesvc.msi in Build 811, a new full setup has been made as a major update. A major update automatically uninstalls a previous version during installation.

Build 1022-1024 (05/02/2018)

Initial Release of IDERI note Administrator, IDERI note Lite Messaging Tools, IDERI note Command Line Tools, IDERI note Service, IDERI note Client Components and IDERI note Administration Tools in Version 3.0

Fixes and Features:

- Introduction of the professional, standard and lite editions.
- Addressing of Active Directory Computer Accounts.
- 32-bit system icons in user interface where applicable.
- IDERI note Service is now 64-bits only.
- IDERI note Administrator is now localized into french.
- Installation requirements: Windows Vista as most down-level platform for most common installers.

Build 1022 (IDERI note Lite Messaging Tools, and IDERI note Administration Tools) contains all files as version 3.0.1022.0.

Build 1023 (IDERI note Administrator, IDERI note Command Line Tools and IDERI note Service) contains all files as version 3.0.1023.0.

Build 1024 (IDERI note Client Components) contains all files as version 3.0.1024.0.

For litetools.msi, and admtools.msi in Build 1022 new full setups were made as major updates. For intadmin.msi, inotecmd.msi and inotesvc.msi in Build 1023 new full setups were made as major updates as well. For intclnt.msi in Build 1024 new full setups were made as major updates. A major update automatically uninstalls a previous version during installation.

Build 1025 (09/20/2018)

Fixes for IDERI note Administrator:

- When launched from the quick login shortcut, IDERI note Administrator would not correctly detect a server running in professional licensing mode. As a result, user interface elements for exclusive use with professional license mode would be disabled (Issue 509).

Build 1025 (IDERI note Administrator) contains all files as version 3.0.1025.

For intadmin.msi in Build 1025 a new full setup has been made as a major update. A major update automatically uninstalls a previous version during installation.

Build 1070 (10/11/2018)

Initial Release of IDERI note Administrator, IDERI note Lite Messaging Tools, IDERI note Command Line Tools, IDERI note Service, IDERI note SDK, IDERI note Client Components and IDERI note Administration Tools in Version 3.1

Fixes and Features:

- Greatly reduced server load when running in professional licensing mode.
- Support for messages on the logon screen.
- Auto-Refresh capabilities in IDERI note Administrator for messages and reception/acknowledgement notifications.
- Usage of Active Directory® display names in IDERI note Administrator.
- IDERI note Administrator now requires at least an IDERI note server version of 2.7 or later.
- Active Directory® client resynchronization support.
- High DPI awareness ("System DPI awareness") of all client components.
- Improved support for the creation of messages from untrusted domains or workgroup computers using a dedicated TCP port.
- Updated and enhanced version of the IDERI note SDK.

Build 1070 (IDERI note Administrator, IDERI note Lite Messaging Tools, IDERI note Command Line Tools, IDERI note Service, IDERI note SDK, IDERI note Client Components and IDERI note Administration Tools) contains all files as version 3.1.1070.0.

For intadmin.msi, litetools.msi, inotecmd.msi, inotesvc.msi, sdk.msi, intclnt.msi and admtools.msi in Build 1070 new full setups were made as major updates. A major update automatically uninstalls a previous version during installation.

Build 1120 (02/01/2019)

Initial Release of IDERI note Hotkey Support Components and IDERI note Administration Tools in Version 3.2

Fixes and Features:

- Initial release of the IDERI note Hotkey Support Components.
- Updated product documentation for the IDERI note Hotkey Support Components.

Build 1120 (IDERI note Hotkey Support Components and IDERI note Administration Tools) contains all files as version 3.2.1120.0.

For inotehid.msi and admtools.msi in Build 1120 new full setups were made as major updates. A major update automatically uninstalls a previous version during installation.

Summary: Current latest versions

- IDERI note documentation 3.2.1120
- IDERI note service (inotesvc.msi) 3.1.1070
- IDERI note administrator (intadmin.msi) 3.1.1070
- IDERI note hotkey support components (inotehid.msi) 3.2.1120
- IDERI note lite messaging tools (litetools.msi) 3.1.1070
- IDERI note command line tools (inotecmd.msi) 3.1.1070
- IDERI note client components (intclnt.msi) 3.1.1070
- IDERI note sidebar gadget (intsbar.msi) 2.2.509
- IDERI note administration tools (admtools.msi) 3.2.1120
- IDERI note SDK (sdk.msi) 3.1.1070
